

Directions

This activity is well-suited for lamination for long-term use. You can also use this file to help children practice their cutting and gluing skills.

If laminating, cut out the circles on the second page, and use velcro (such as 0.59" diameter self-adhesive dots) to secure them to the caterpillar page. To align the velcro evenly (and thus make adhering the days easier for children), I recommend first attaching both halves of the velcro to the background page. Then align the weekdays and adhere them to the pre-placed velcro.

You can store the weekdays (randomly) at the bottom of the page.

All designs were created by Erin P.T. Canning. Thank you for respecting my terms of use.

Terms of use

- You may download this file.
- You may save this file on your computer.
- You may print and use these activities for non-commercial, personal or classroom use.
- You may share the link to WAM's Pre-K Resources page so others may find these activities.

- You may not alter this file in any way.
- You may not claim this file as your own.
- You may not link directly to the download file; instead, link to the web page on which this resource is available.
- You may not profit from this file in any way.
- You may not profit from print copies of this file in any way.
- You may not store this file on any other website.

Days of the week

Seven empty circles arranged in a horizontal row, intended for writing the days of the week.

Cut out all times on this page.
