

# Directions

This activity is well-suited for lamination for long-term use. You can also use this file to help children practice their cutting and gluing skills.

If laminating, cut out the color-filled butterflies on the last page, leaving a 1/4" white border to save your sanity, and use velcro (such as 0.59" diameter self-adhesive dots) to secure them to their designated spots on page 2 or 3. To ensure proper alignment, I recommend first adhering both sides of the velcro to background pages, and then align and adhere the center of each color-filled butterfly to the pre-placed velcro.

Younger learners can use page 2 to work on color recognition and matching. Older learners can use page 3 to help them recognize the names of the colors.

All designs were created by Erin P.T. Canning. Thank you for respecting my terms of use.

## Terms of use

- You may download this file.
- You may save this file on your computer.
- You may print and use these activities for non-commercial, personal or classroom use.
